

## Test Plan

Submitted by [MonicaZugan](/users/monicazugan) (/users/monicazugan) on Thu, 09/24/2009 - 10:34  
in

### Test cases to be executed on mac and pc, latin and greek tools

#### Installation

- 1) installation on previous build
- 2) remove components from add-ons
- 3) clean installation - release notes should open when completed (or when clicking on version # from banner)
- 4) test on different version of firefox

#### Uninstall

- 1) Uninstall all Alpheios tools from the FF Tools/Add-Ons menu. Upon restart of FF, type about:config in browser location and then filter on 'extensions.alpheios'. Verify that no alpheios settings remain.

#### Alpheios tools enabled

- 1) test that the Alpheios toolbar is added to the Firefox toolbar when link to any enhanced text
- 2) test that the Alpheios toolbar is added to the Firefox toolbar when link from any Alpheios-enabled site selected from greek/latin links

#### Alpheios tools disabled

- 1) test that Alpheios toolbar is removed when visiting any non-alpheios URLs from Location Bar or History menu in the browser
- 2) test that Alpheios toolbar is removed when using back/forward buttons on the browser
- 3) test that a pop-up should be generated when Alpheios toolbar is removed
- 4) answer survey in pop-up
- 5) send feed-back from pop-up, from toolbar, from help menu

#### Default configuration (Firefox toolbar with text)

- 1) correct language should be detected and displayed on the right side of toolbar
- 2) the correct language should replace xxxxxx in Look up a xxxxxxx word by double-clicking on it.
- 3) check Alpheios drop-down menu and links to inflection table, grammar and help

#### Default configuration (Firefox toolbar with Alpheios enhanced text)

- 1) correct language should be detected and displayed on the right side of toolbar
- 2) the correct language should replace xxxxxx in Look up a xxxxxxx word by double-clicking on it.
- 3) check Alpheios drop-down menu and links to inflection table, grammar and help

#### Default configuration (Alpheios enhanced text toolbar)

- 1) the correct language should replace xxxxxx in Look up a xxxxxxx word by double-clicking on it.
- 2) reading mode should be the default mode and translation panel should be opened by default
- 3) check switch to quiz mode, inflection table, grammar, options and help. should open the correspondent splash screen pages.

#### Options (can be access from add-ons, firefox toolbar and Alpheios toolbar for enhanced text)

- 1) in General, change to mousemove in word lookup tab and check that mouse over is the trigger for lookup
- 2) in General, enable interlinear translation in the correspondent tab. Show Interlinear Translation checkbox is enable on the Alpheios enhanced text.
- 3) check/uncheck Show Interlinear Translation checkbox to enable/disable the interlinear translation in the Translation Panel or in the enhanced text.
- 4) in Advanced, select Window/Panel Settings button. uncheck Translation Panel in the Enhanced column in the Panels Open By Default section to change the default status to close. open any enhanced text in reading mode/quiz mode, the translation panel should not be opened automatically.
- 5) in Advanced, select Window/Panel Settings button. check Translation Panel in the Enhanced column in the Panels Open By Default section to change back the default status to open. open any enhanced text in reading mode/quiz mode, the translation panel should be opened.
- 6) Change setting to trigger lookup from double click to mouse over when in quiz mode. Mouseover is disabled in Quiz Mode pops up. Double-click to select a word.
- 7) Change setting to trigger lookup from double click to mouse over when in reading mode. Switch to quiz mode. Verify that

double click is the trigger to select a word.

#### **Panels (Alpheios enhanced text)**

- 1) double click (or mousemove) on any word to open short dictionary definition. The morphology popup will appear for that word.
- 2) click on diagram, define and inflect (if available). check that treebank, full dictionary definition and inflection table (if available) popups will open.
- 3) click on any hyper-linked grammatical term in the morphology popup to open the relevant section in the Grammar.
- 4) double click (or mousemove) on any word in quiz mode will open the quiz window.
- 5) all popup should close when navigating away from Alpheios site.

#### **Panels (Alpheios text)**

- 1) double click (or mousemove) on any word to open short dictionary definition. The morphology popup will appear for that word.
- 2) click on define or inflect (not always available). check that full dictionary definition and inflection table (if available) popups will open.
- 3) click on any hyper-linked grammatical term in the morphology popup to open the relevant section in the Grammar.
- 4) check that quiz mode is not available.
- 5) all popup should close when navigating away from Alpheios site.

#### **Latin inflection tables, grammar and treebank (cupidinibus) noun**

- 1) double click (or mouse over) on cupidinibus (line 2 of the Elegies 1). all 3 icons should be available in morphology panel.

- 3) the ending ibus (masculine/feminine ablative plural) should be highlighted in yellow in the Third declension column (exact match). all the other endings in ibus should be highlighted in blue.
- 4) check that same endings are highlighted also when switching to Full table.
- 5) click on the Inflection Index link to access of all available inflection tables.
- 6) check that the ablative link will open that specific section in the Bennett's grammar.
- 7) check that the 3rd declension link will open that specific section in the Bennett's grammar.
- 8) click on the Diagram icon, the Diagram View pop-up should open with cupidinibus highlighted in yellow in the tree and in the sentence.
- 9) double click on cupidinibus from the tree. only inflect and define icons should be available in lookup. click on icons to open the related panels.

#### **Latin inflection tables, grammar and treebank (aut) conjunction --> no inflection table available**

- 1) double click (or mouse over) on aut (line 3 of the Elegies 2). only diagram and define icons should be available.
- 2) click on the Diagram icon, the Diagram View pop-up should open with aut highlighted in yellow in the tree and in the sentence.
- 3) double click on aut from the tree. only define icon should be available in lookup. click on icon to open the Dictionary panel.
- 4) all panels and pop-ups should close when navigating away from Alpheios site.

#### **Latin inflection tables, grammar and treebank (constantis) adjective (bug 332)**

- 1) double click (or mouse over) on constantis (Elegies 1). all 3 icons should be available in morphology panel.
- 2) click on inflection, it should open the Adjective inflection table.
- 3) the ending is (singular genitive masculine) should be highlighted in yellow in the 3rd declension column (exact match). all the other endings in is should be highlighted in blue.
- 4) click on the Inflection Index link to access of all available inflection tables.
- 5) check that the 3rd Declension link should open the Adjectives of the Third Declensions section in the Bennett's grammar.
- 6) check that the genitive and adjective links should open the specific sections in the Bennett's grammar.
- 7) click on the Diagram icon, the Diagram View pop-up should open with constantis highlighted in yellow in the tree and in the sentence.
- 8) double click on constantis from the tree. only inflect and define icons should be available in lookup. click on icons to open the related panels.

#### **Latin inflection tables, grammar and treebank (quid) adverb --> no inflection table available**

- 1) double click (or mouse over) on quid (Elegies 2). only diagram and define icons should be available.
- 2) click on the Diagram icon, the Diagram View pop-up should open with quid highlighted in yellow in the tree and in the sentence.
- 3) double click on quid from the tree. only define icon should be available in lookup. click on the icon to open the Dictionary panel.
- 4) check that the adverb link should open the Adverb section in the Bennett's grammar.
- 5) all panels and pop-ups should close when navigating away from Alpheios site.

#### **Latin inflection tables, grammar and treebank (illis) pronoun --> no inflection table available**

- 1) double click (or mouse over) on illis (Elegies 2). only diagram and define icons should be available.
- 2) click on the Diagram icon, the Diagram View pop-up should open with quid highlighted in yellow in the tree and in the sentence.
- 3) double click on illis from the tree. only define icon should be available in lookup. click on the icon to open the Dictionary panel.

- 4) check that the pronoun and 6th Declension links should open the related sections in the Bennett's grammar.
- 5) all panels and pop-ups should close when navigating away from Alpheios site.

#### **Latin inflection tables, grammar and treebank (vendere) verb infinitive**

- 1) double click (or mouse over) on vendere (Elegies 2). all 3 icons should be available in morphology panel.
- 2) click on inflection, it should open the Verb Conjugations Infinitive table.
- 3) the ending in ere for the present active should be highlighted in yellow in the 3rd Conjugation column (exact match) and in blue in the second Conjugation column.
- 4) check that similar endings are highlighted in blue when switching to verb conjugation.
- 5) click on the Inflection Index link to access of all available inflection tables.
- 6) check that the Verb link will open the Verbs section in the Bennett's grammar.
- 7) check that the 3rd conjugation and infinitive will open those specific sections in the Bennett's grammar.
- 8) click on the Diagram icon, the Diagram View pop-up should open with vendere highlighted in yellow in the tree and in the sentence.
- 9) double click on vendere from the tree. only inflect and define icons should be available in lookup. click on icons to open the related panels.

#### **Latin inflection tables, grammar and treebank (ornato) verb participle**

- 1) double click (or mouse over) on ornato (Elegies 2). all 3 icons should be available in morphology panel.
- 2) click on inflection, it should open the Verb Participles table.
- 3) click on the Inflection Index link to access of all available inflection tables.
- 4) check that the verb participle link will open the Participles section in the Bennett's grammar.
- 5) check that the ablative link will open the Ablatives section in the Bennett's grammar.
- 6) click on the Diagram icon, the Diagram View pop-up should open with ornato highlighted in yellow in the tree and in the sentence.
- 7) double click on ornato from the tree. only inflect and define icons should be available in lookup. click on icons to open the related panels.

#### **Latin inflection tables, grammar and treebank (cepit) verb**

- 1) double click (or mouse over) on cepit (Elegies 1). all 3 icons should be available in morphology panel.
- 2) click on inflection, it should open the Verb Conjugations Full table.
- 3) the ending in it should be highlighted in yellow (exact match) in the 3rd Person Singular Perfect of Active Indicative 3rd Conjugation column.
- 4) check that same cell is highlighted when switching to conjugation>mood>voice or to mood>conjugation>voice.
- 5) click on the Inflection Index link to access of all available inflection tables.
- 6) check that the verb and 3rd Conjugation links will open the related sections in the Bennett's grammar.
- 7) check that the indicative link will open the Indicative section in the Bennett's grammar.
- 8) click on the Diagram icon, the Diagram View pop-up should open with cepit highlighted in yellow in the tree and in the sentence.
- 9) double click on cepit from the tree. only inflect and define icons should be available in lookup. click on icons to open the related panels.

#### **Greek inflection tables, grammar and treebank (μοῦσα) noun**

- 1) double click (or mouse over) on μοῦσα (line 1 of the Odyssey, Book 1). all 3 icons should be available in morphology panel.
- 2) click on inflection, it should open the Noun inflection table.
- 3) the ending α (feminine vocative singular) should be highlighted in yellow in the First declension column (exact match). all the other endings in α should be highlighted in blue.
- 4) check that same endings are highlighted also when switching to noun simplified table.
- 5) click on the Inflection Index link to access of all available inflection tables.
- 6) check that the 1st Declension link will open the first declension (stem in α) section in the Smyth's grammar.
- 7) check that the vocative link will open that specific section in the Smyth's grammar.
- 8) click on the Diagram icon, the Diagram View pop-up should open with μοῦσα highlighted in yellow in the tree and in the sentence.
- 9) double click on μοῦσα from the tree. only inflect and define icons should be available in lookup.

#### **Greek inflection tables, grammar and treebank (ἐπεῖ) conjunction --> no inflection table available**

- 1) double click (or mouse over) on ἐπεῖ (line 2 of the Odyssey, Book 1). only diagram and define icons should be available.
- 2) click on the Diagram icon, the Diagram View pop-up should open with ἐπεῖ highlighted in yellow in the tree and in the sentence.
- 3) double click on ἐπεῖ from the tree. only define icon should be available in lookup. click on icons to open the related panels.
- 4) all panels and pop-ups should close when navigating away from Alpheios site.

#### **Greek inflection tables, grammar and treebank (πολλὰ) adjective (bug 262)**

- 1) double click (or mouse over) on πολλὰ (line 4 of the Odyssey, Book 1). all 3 icons should be available in morphology panel.
- 2) click on inflection, it should open the Adjective inflection table.
- 3) the ending α (plural accusative neuter) should be highlighted in yellow in the 2nd declension column (exact match). all the other endings in α should be highlighted in blue.
- 4) check that same endings are highlighted also when switching to Adjective simplified table.
- 5) click on the Inflection Index link to access of all available inflection tables.
- 6) check that the 1st&2nd Declension link will open the Adjectives of the First and Second Declensions section in the Smyth's

grammar.

7) check that the accusative link will open that specific section in the Smyth's grammar.

8) click on the Diagram icon, the Diagram View pop-up should open with πολλά highlighted in yellow in the tree and in the sentence.

9) double click on πολλά from the tree. only inflect and define icons should be available in lookup.

**Greek inflection tables, grammar and treebank (πολλά) adverb** (bug 262) --> **no inflection table available**

1) double click (or mouse over) on πολλά (line 1 of the Odyssey, Book 1). only diagram and define icons should be available.

2) click on the Diagram icon, the Diagram View pop-up should open with πολλά highlighted in yellow in the tree and in the sentence.

3) double click on πολλά from the tree. only define icon should be available in lookup. click on icons to open the related panels.

4) all panels and pop-ups should close when navigating away from Alpheios site.

**Greek inflection tables, grammar and treebank (τῷ) article**

1) double click (or mouse over) on τῷ (second line of Prometheus and the gift of fire). all 3 icons should be available in morphology panel.

2) click on inflection, it should open the Article table.

3) the exact match should be highlighted in yellow in the Singular Dative Neuter cell and in blue in the Singular Dative Masculine cell.

- 2) have grammar and inflection window open for the latin, the inflection table open for the greek enhanced text and the grammar open for latin Alpheios text in an other tab.
- 3) you should be able to switch from one tab to the other and refresh the content of the windows as they are shared between tabs.
- 4) verify that the lookup pop-up stays open when switching from tab to tab and that shows the correct definition for the selected word.
- 5) close a tab. It should close all the related windows (e.g. inflection table and grammar) and panels (e.g. definition or diagram).

**Multiple windows (tbd)**

- 1) have Alpheios enhanced text for Latin open in one window, then the Greek tool open in an other window and browse any latin Alpheios text in an other window.
- 2) have grammar and inflection window open for the latin, the inflection table open for the greek enhanced text and the grammar open for latin Alpheios text in an other window.
- 3) you should be able to switch from one window to the other and refresh the content of windows and panels.
- 4) verify that the lookup pop-up stays open when switching from window to window and that shows the correct definition for the word.
- 5) close a window. It should close all the related windows (e.g. inflection table and grammar) and panels (e.g. definition or diagram).

## Comments

**added test cases for Dictionary search** (</content/test-plan#comment-23>)

added test cases for Greek Dictionary search

**additional tests needed** (</content/test-plan#comment-21>)

- 1) Under inflection tables, grammar and treebank, we should add test cases for each part of speech. Need to make sure to test at least one match on each distinct inflection table in each language.
- 2) Under greek inflection tables, we should also add tests for matches on endings which don't appear by default (e.g. dialect variations)
- 3) Need also to test inflection matching which ignores accents, diaeresis, etc.
- 4) Under Quizzes, need to add test cases for each supported part of speech
- 5) Add tests for each item in the Alpheios toolbar (e.g. About, Help, Feedback, Site) for both basic toolbar and in site enhanced text toolbar
- 6) Test dictionary search order (Greek)
- 7) Add test cases for some of the strange diambiguation scenarios for enhanced texts? (E.g. See Bugs 299 and 262)

**added test cases for Greek** (</content/test-plan#comment-22>)

added test cases for Greek Inflection tables (1,2,3 and 7) - I think comment 5 is pretty much covered. maybe I'll add a new test case.
